

Easy therm 2

The Easy therm 2 is a small powerful microprocessor controlled induction heater for heating of small sized components including bearings up to 40 kg!! It is easy to use and portable, complete with a robust case, ideal to use on location.

Technical information	
Voltage	110-230V
Frequency	50 or 60Hz
Power	3.6kVA
Heater mass	17kg
Dimensions	345x200x240mm
Temp. mode	Max. 240/400°C
Width U-core	120mm
Height U-core	100mm

Dimensions:						
Size induction yokes mm	Standard min. bore part (A)	Standard max. outer diameter part (B)	Standard max. width part (C)	Max. weight part	Max. outside diameter with extension yoke 40x50x75mm	Max. width with extension yoke 40x50x75mm
